

Largest Free Flowing QUICK CONNECT COUPLINGS

Browse our online store, with more than 9,600 stock components and technologies, most ready to ship within 24 hours.

Nordson MEDICAL's line of LinkTech Quick Disconnect Couplings offer a 1/2" flow capacity in its 65PS Series which are manufactured from high-performance thermoplastic Udel Polysulfone material. These couplings have a full flow, non-valved, smooth internal bore with minimal turbulence. These autoclavable couplings are extremely durable and withstand chemical resistance.

FEATURES & BENEFITS

- Advanced plastic thumb-latch couplings
- Full-flow, non-valved, smooth internal bore for maximum flow with minimal turbulence
- Extremely durable
- Great chemical resistance
- Audible click when coupled
- Integral end terminations
- Small and compact
- One-hand operation
- Latch guard eliminates accidental disconnects
- Large push button
- Interconnect with each other and with similar industry plastic-latch couplings

MATERIALS & CONSTRUCTION

- **Bodies and Terminations:** Glass-Filled Polypropylene
- **Thumb-latch:** Acetal copolymer
- **Springs:** Stainless Steel
- **O-rings:** Food Grade EPDM. Others available
