Single-use tubing connectors are important components in an industry where contamination is a major concern. Our single-use plastic connectors are safe to use, intuitive, and cost-effective. Perhaps the most significant advantage of Nordson MEDICAL’s single-use connectors is the reduction of contamination. Single-use greatly reduces the risk of infection and the transmission of disease. User-friendly designs make the components easy to use, and the availability of multiple color options helps users quickly identify fluid lines. Cleaning and sterilizing components can be time-consuming and expensive. Single-use fittings don’t require these timely cycles, decreasing your overall costs.

LEARN MORE AT NORDSONMEDICAL.COM/SHOP

Many fluid management components are used in endoscopic devices used for examining digestive systems, identifying obstructions, and performing biopsies and other minimally invasive surgeries. When you require high quality and reliability, barbed check valves, luers, and tube-to-tube fittings from Nordson MEDICAL exceed expectations.

SINGLE-USE TUBING CONNECTOR TRUTHS

- **Barbed Check Valves** provide a reliable mechanical connection and reduce the risk of contamination.
- **Luer Fittings** come in over 100 configurations for joining tubing from 1/16” (1.6 mm) ID to 1/4” (6.4 mm) ID and include many color options.
- **Tube-to-Tube Fittings** offer over 100 configurations of barbed tube-to-tube fittings, including straight tube connectors, Y connectors, multiport connectors, elbow fittings, and tee fittings, all with reducer options.

QUALITY WORKS HERE.

We design and manufacture components and finished devices that have a direct and positive impact on the lives of countless patients around the world. From our line workers to our design engineers, we hold ourselves to the highest standards of quality.
