Nordson MEDICAL is your single source for extrusions. Whether you need them from prototype to long-term, high-volume needs, we can develop specialized extruded tubing for complex applications, at any scale.

BUY ONLINE AT NORDSONMEDICAL.COM/SHOP

TAPERED & BUMP SPECIALIZED EXTRUDED TUBING
Tapered tubing has a transition in outer and inner diameter in a section of the extruded tube. Bump tubing is similar to tapered tubing but has a bump (area of increased outer diameter) along the length of the tube.

EXTENSIVE CAPABILITIES
- Coextruded multilayer tubing
- High pressure braided tubing
- Taper/bump
- Ultrathin and microthin tubing
- Profile tubing
- Lubricious tubing

OPTIONS OF DIFFERENT MATERIALS & SIZES
- Shaft-ready Extrusions: We have 100+ extrusions available in various materials and sizes for building complex shafts, in stock and ready to ship.
- Rapid Custom Extrusion Tool: Order custom single-lumen extrusions online that ship in as little as 2 weeks.
- Design Your Own Extrusion: Need customization beyond our standard specs? Create a fully custom extrusion made to your exact specifications to request a quote.

CUSTOMIZED MATERIALS
- Full range of thermoplastics
- Fluoroplastics (FEP, PTFE)
- Engineering plastics (PEEK, Polysulphone)
