Nordson MEDICAL has 50+ years of experience designing, developing, and manufacturing finished medical devices and subassemblies leveraging our deep expertise in component technologies. This vertical integration helps teams reduce costs, mitigate risk, streamline supply chain, and ensure consistent quality.

LEARN MORE AT NORDSONMEDICAL.COM

PROTOTYPE TO PRODUCTION SOLUTION

We provide a full range of services to bring to life a broad range of complex medical devices and components, including:

- **Catheters and Cannulae**: From simple access catheters to complex therapeutic catheters, we provide custom options to meet your needs.
- **Shafts and Sheaths**: We engineer shafts that meet your clinical and technical requirements, from braid- or coil-reinforced tubing to complex steerable devices.
- **Fluid Management Solutions**: We provide subassemblies and tubing sets leveraging thousands of stock and custom fittings.
- **Delivery Devices**: Whether you’re delivering an implant, a drug, a biomaterial, or other therapy, we can work with you on a custom solution.

COMPLIANCE THROUGH AUTOMATION

One of the ways we ensure the highest level of quality and compliance in medical device manufacturing is by implementing proven automated processes and systems, including:

- Electronic quality management system
- Statistical Process Control (SPC) software
- Production and process monitoring system
- Precision, optical, measurement system

QUALITY WORKS HERE.

We design and manufacture components and finished devices that have a direct and positive impact on the lives of countless patients around the world. From our line workers to our design engineers, we hold ourselves to the highest standards of quality.
