Our extensive selection of polyimide tubing includes very thin walls, tight-tolerance inner and outer diameters (0.004” – 0.088”), high dielectric properties, high column strength, and the ability to withstand high temperatures.

BUY ONLINE AT NORDSONMEDICAL.COM/SHOP

FEATURES OF THIN-WALL POLYIMIDE TUBING
- USP Class VI compliant
- Chemically inert
- Excellent chemical resistance
- Excellent torque transmission
- Excellent column strength
- Non-melting
- Microsize IDs
- Transparent

PRECISION WIRE COATING
Because of its outstanding electrical insulation properties, polyimide makes an ideal wire coating, with:
- High dielectric strength
- Precision tolerances
- Resistance to chemicals and high temperatures
- Thin wall thickness
- High strength

UNLIMITED CUSTOM CONFIGURATIONS
- ID range: 0.004” – 0.085”
- Wall thickness range: 0.0005” – 0.0100”
- Colors: amber, red, yellow, black, and green
- Quick turn: available in as little as 2 weeks
