Compatible with Existing Instrumentation

SF Series Instrument Tees work well with existing pharmaceutical instrumentation and are available in 1/2” and 1” tubing IDs. Critical to a successful single-use implementation, the fittings work for pressure testing, fluid transfer, and filtration applications. The configuration is a standard 1.5” TC style interface on the instrument side and tee style for the fluid path. The fittings also utilize Nordson MEDICAL’s popular 600 series barb, which is ideally suited for silicone and TPE tubing. Constructed of Nordson MEDICAL’s standard polyethylene resin, the instrument tees utilize materials found in many single-use bags being used around the world.

Features & Benefits

- Works with existing pharmaceutical instrumentation
- Single-use technology
- ASME BPE compliant interface on the instrument side
- Tee style for the fluid path
- 600 series barb
- Common industry materials

Specifications

- **Materials:**
  Animal-free Polyethylene
- **Tubing Sizes:**
  1/2” and 1” tubing IDs
- **Configuration:**
  1.5” TC style
SF Series Instrument Tees ship with an optional isolator that system integrators and assembly houses can heat seal into the TC side. Adding one of Nordson MEDICAL’s end caps and a PharmaLok™ Easy-Open Clamp completes the assembly and makes it ready for sterilization and shipment to end user facilities.
